Mon Feb 13 2012 09:22:03 GMT+0000 (GMT Standard Time)

Manchester City manager Roberto Mancini refused to give much away about the possibility of Carlos Tevez returning to action but indicated an apology remains the key to him finding favour again at Eastlands.

If a User does not have access to an Application, they may still be able to have access to the widgets from that Application, they will just not be able to launch into the Application from the widgets

Once the number of Users = the number of licenses for a Application or widget, the Club Administrator will not be able to grant any further access unless they remove someone's access or increase the number of licenses

- some widgets will require read only as well as write levels of access, eg Calendars. this is achieved by 3 way toggle switches:
- 3 way toggles
- blank: no access
- orange: read-only access
- green: full access
- note this is different to the widget 'Settings' which change the information that the widget delivers. write access refers to the Users ability to add data through the widget
- widgets that do not allow users to manipulate data have only 2 options: blank and orange
